

CONTENTS

- 15 Alexander Vladimirovich Gorodysskiy (dedicated to his 75th anniversary).
E. V. Panov
- 16 Developing of electrochemistry in Kharkov National University. **V.I. Larin**

FUNDAMENTAL ELECTROCHEMISTRY

- 21 Developing and manufacturing of lithium power sources. **V.D. Prisiazhnyi**
- 23 The inhibiting effect of the organic substances at the different electrodes.
F. I. Danilov, V.B. Obratsov
- 27 Interfacial electrical potential of nanoparticles in hydrophilic dispersed systems. Methods of its estimation and reasons which cause its variations.
N. O. Mchedlov-Petrosyan
- 32 Improvement of the efficiency of metal electrorefining in aqueous solutions.
F. D. Manilevich, L. F. Kozin
- 36 Electrochemical synthesis and physicochemical properties of composite oxide materials. **A. B. Velichenko, R. Amadelli, D. Devilliers**
- 39 The kinetic of electrode reactions of oxidation-reduction processes at the presence of ozone. **G. O. Tatarchenko**
- 43 A mathematical model of the metal electrodisolution at the active-passive transitions in the presence of salt film. **V. V. Nechyporuk, I. V. Berladyn, T. S. Slipenyuk**
- 46 Supercapacitors on the basis of hexafluorophosphates of alkaline metals.
L. E. Baydych, V. N. Plakhotnyk, L. Ernst, Yu. V. Kovtun
- 49 Hydrogen accumulation in the photoelectrochemical system on basis of GaAs.
I. A. Rusetskii, G. Ya. Kolbasov G.Ya., D. B. Dan'ko, Yu. M. Solonin, O. Z. Galiy
- 52 Quantum-chemical modelling and experimental investigation of molten carbamide electrolysis process. **N. Kh. Tumanova, V. Y. Atamanyk, O. I. Bojko, S. A. Kochetova, E. A. Babenkov**
- 55 Coordination compounds of transition 3d-metals as precursors for oxygen reduction electrocatalysts. **Pirsky Yu.K.**
- 58 Electrochemical doping as a method of directed synthesis of electrode materials for power sources. **Sokolsky G.V., Ivanova N.D., Ivanov S.V., Boldurev Ye.I.**
- 62 Electrochemical conversion of 'small' molecules into valuable organic products. **Koshechko V.G., Titov V.E., Kiprianova L.A.**
- 65 Influence of different factors on processes of electrochemical dehalogenation of C-1 and C-2 freons. **Titov V.E., Mishura A.M., Koshechko V.G.**
- 68 Polymer platforms for enzyme electrodes. **Kovalchuk E.P., Ostapovich B.B., Turik Z.L., Blajevsky E.**
- 72 *Ab initio* calculations of thermodynamic and structural characteristics of solvation HCl in methanol. **Bulavin V.I., Volobuev M.N., L. Adamowicz, Kramarenko A.V.**
- 76 Conductivity of non-aqueous electrolyte solutions: problems and perspectives of theoretical description. **O. N. Kalugin**
- 81 Molten salts as media for the synthesis of carbon nanoparticles. **E. V. Panov, V. M. Ogenko, S. V. Volkov, V. F. Lapshin, T. S. Glushchak**
- 83 Thermodynamic investigations of systems with electron-transfer reactions.
Tevtul Ya. Yu., Anchenko G. V., Mishchenchuk V. V.
- 87 New electrode materials based on polycarbon allotrops. **I.A. Novoselova**

- 92 Electrochemical and catalytic behaviour of carbon substances. **S.D. Korolenko, F.V. Makordej, L.D. Konovalenko, L.I. Korolenko**
- 95 Influence of a field of ion on electrochemical activity of particles of the nearest environment. **V. Vargaluk**
- 99 Electrosynthesis of conducting polymers based on aniline derivatives and used their as sensitive layers in chemoresistive sensor arrays. **Kurys Ya.I., Netyaga N.S., Kukla A.L., Pavlyuchenko A.S.**
- 102 Kinetics of step-wise electrochemical reactions with participation of stable intermediates. **Protsenko V.S., Danilov F.I.**
- 105 Electrocatalytic characteristics of tetraphenylporphyrin and its complex with Mn (III) in reaction of oxygen electroreduction. **A. A. Dzhambek, O. I. Dzhambek, F. V. Makordej, Z. I. Zhilina, Yu. V. Ishkov.**
- 108 Red-ox processes in the natural water. **Vyatkina O.V., Strizhevskiy A.I., Pershina Ye.D.**
- 112 Kinetics of non-ferrous metal ions transport by ion-exchange materials of different origin. **K.A. Kazdobin, S.L. Vasiluk, N.V. Stefanyak, V.N. Belyakov**
- 115 Effects and importance of electrochemical reduction of water leavings in aprotic media. **Pud A.A., Rogalsky S.P., Shapoval G.S., Nestyuk N.V.**
- 118 Correlation of the fermi energy of Ni, Ti, Zn with the electrocatalytic activity of the triple alloys on the base of these metals. **A.D.Andreyanov, I.A.Kuznyetsova**
- 121 Effect of the enthalpy and entropy factors on the electrocatalytic activity of the triple dispersed Ni-Cr-Nd alloys. **A.D.Andreyanov, I.A.Kuznyetsova, V.P.Petrosyan**
- 124 Influence of CrO_4^{2-} and $\text{Cr}_2\text{O}_7^{2-}$ on the electrochemical dissolution of amorphous alloys $\text{Al}_{87}\text{Ni}_8\text{Y}_5$. **Bednarska L. M., Kovbuz M.O., Hertsyk O. M.**
- 127 The features of kinetics of metals chemical reduction from solutions on dielectrics in critical hydrodynamic regime conditions. **Beshentseva O.A., Kalugin V.D., Opaleva N.S.**
- 131 Continuous convective layer breaking at the Rayleigh-Benard mixing origin in the electrochemical systems. **Winkler I. A.**
- 134 Nanostructure and optical properties of electrodeposited films of amorphous tungsten oxide. **Volkov S.V., Kolbasov G.Ya., Krasnov Yu.S.**
- 137 Electrocatalytic properties of dispersed TiO_2 - electrode. **Vorobets V.S., Kolbasov G.Ya., Karpushin M.O., Oblovatna S.Ya.**
- 141 Influence of an electronic state of an electrode surface to kinetics of electrochemical processes in system the semiconductor-electrolyte. **Vorobets M.M., Voloshchuk A.G., Tevtul Ya.Yu.**
- 144 Electrochemical and photocatalytical properties of $\text{TiO}_2/\text{ZrO}_2$ electrodes. **Yu. Gnatyuk, N. Smirnova, A. Eremenko, V. Vorobetz, I. Kolbasova, O. Linyucheva.**
- 148 Electrical conductance and ion association of 1:1- electrolytes in mixed solvents aqueous-acetonitrile and methanol-acetonitrile. **Efimov P.V., Zaitseva I.S., Bondar N.I., Zholnovach A.M., Gostkina E.V.**
- 151 A potentiometric study of the complex formation of silver with potassium iodide. **Zarubitskii O.G, Lisogor A.I, Dyachenko N.M., Dupak L.G.**
- 154 Chemical Evolution in the Galaxy. **Zakhozhay V.A.**
- 159 Electrochemical behaviour of the melts with ionic-electronic conductivity. **V. F. Zinchenko**

- 163 Photovoltaic properties of the contact electrode the inoculated gallium arsenide - an electrolyte. **L. D. Konovalenko, F. V. Makordej, V. I. Andreev, O. N. Soloveva**
- 166 About kinetics part in membrane electrode potential forming. **Korobova I.V., Chmilenko F.A.**
- 170 Kinetics of cathodic processes on niobium in alcohol-water solutions. **Larin V.I., Sidorenko O.V., Opaleva N.S.**
- 174 Kinetics of ionization of aluminium in NaOH solutions with the different additives. **T. Lukashchuk, V. Larin, O. Bakumenko, S. Pshenichnaya**
- 177 Solutions of Et₄NBF₄ in acetonitrile from the point of view quasilattice model: investigation by using NMR and conductometry techniques. **Lukinova E. V., Kalugin O. N., Novikova A. Yu.**
- 181 The investigation of the behaviour of the system during anode dissolution of metals at active-passive transitions. **Nechyporuk V.V., Tkachuk M.M., Berladyn I.V., Nykyforets' Yu.T.**
- 184 Nanocrystalline tin dioxide films electroconductivity: the influence of the synthesis conditions, the temperature, and the gas atmosphere. **E. V. Panov, E. A. Genkina, T. S. Glushchak**
- 187 Electrical conductivity and association of lithium perchlorate in the tetrahydrofuran - dimethyl formamide mixtures at 5, 15, 25, 35 and 45 °C. **Panchenko V.G., Nabokova A.Yu., Kalugin O.N., Vyunnik I.N., Nikolaychuk A.G.**
- 190 Investigation of kinetic regularities of tin ions on niobium with different oxides content discharge. **Pereverzeva E.B., Kalugin V.D., Voronko L.Y.**
- 193 Electrochemical impedance spectroscopy of rough and fractal electrodes. **Pototskaya V. V.**
- 196 Modelling of corrosive-electrochemical process on metal-electrolyte interface: a molecular dynamics approach. **Pokhmurskii V.I., Kopylets V.I., Kornii S.A.**
- 200 Electrochemical conduct of copper in electrolyte with small concentration of composites. **Pravda A.A., Radchenkova A.P., Larin V.I.**
- 203 Effect of surface treatment for Mg₂Ni alloy on its electrochemical hydrogen sorption-desorption. **Saldan I.V.**
- 206 Investigation of flocculative structurization in suspension. **Slipenyuk T.S., Nechyporuk V.V.**
- 210 Modeling of common influence of electrode surface, cation and electric fields of processes of electroreduction of wolframate-ion. **Soloviev V.V., Chernenko L.O.**
- 213 A mathematical model and behaviour of electrochemical system during the cathode precipitation of metals at the potentiostatical conditions. **Tkachuk M.M., Yuz'kova V.D., Khovanets' N.V., Turash G.O., Fedorov A.O.**
- 216 The thermodynamic aspects of molecular oxygen electroreduction mechanism. **Trunov A.**
- 220 Chemical and electrochemical dissolution of copper and its alloys in solutions of different composition. **Khobotova E.B., Larin V.I., Datsenko V.V., Dobriyan M.A.**
- 223 Molecular dynamics simulation of structure and dynamics of non-aqueous electrolyte solutions in carbon nanotubes. I. Acetonitrile and dimethyl sulphoxide. **V. V. Chaban, Ya. V. Kolesnik, O. N. Kalugin**
- 226 Electrochemical and electrooptical behaviour of some viologens in liotropic crystalline medium. **G.G. Yaremchuk, T.A. Mirnaya, S.V. Volkov**

- 230 Nanostructural Peculiarities and Electrochemical Behavior of silver. **Cesiulis H., Bersirova O., Prosycevas I.**

ELECTROCHEMICAL POWER ENGINEERING

- 234 On charge transporting mechanism in Li-ion battery electrolytes including complex fluorides and aprotic mediums. **Plakhotnyk A.V., Ue M., Rossikhin V.V., Tovmash N.F., Glebov R.V.**
- 237 The swelling of electrode material with NiCo₂O₄. **Rakityanskaya O.F., Stupichenlo P.M., Truhtanova L.V., Polischuk V.E.**
- 239 Physical-chemical characteristic of (CH₃)₂SO – LiBF₄, (CH₃)₂SO₂ – LiNO₃ systems melts. **D.O. Tretyakov, V.D. Prisiazhnyi**
- 242 Electrochemical properties of high disperse titanium dioxide as an anode material for lithium-ion batteries. **S. Chernukhin, S. Kirillov, T. Lesnichaya, V. Prisyaznyi**
- 245 Transport of lithium ions into electrolytic molybdenum oxysulfides and oxides. **Shembel E.M., Apostolova R.D., Tsyachny V.P., Kirsanova I.V.**

TECHNICAL ELECTROCHEMISTRY

- 249 Electrophysical properties of the oxide systems La and Ni with additions Co and Cu. **Baklan V. U., Uminskiy M.V., Kolesnikova I.P., Kolesnikov A.V.**
- 252 Electrochemical behaviour of indium and copper in thin-layer cell. **Blyzniuk A.V., Omelchuk A.A., Kozin V.F.**
- 255 Investigation of influence of multifunctional organic additives on the process of copper and zinc electrodeposition from pyrophosphate solutions. **V. Vargaluk, V. Ivanko, H. Efimenko**
- 258 Electrodeposition of black nickel from chloride electrolytes. **A. A. Girenko, F. I. Danilov**
- 261 Peculiarities of the anodic processes on zinc in alkaline media. **D. A. Golovko, Ye. A. Belyanovskaya**
- 264 Electrochemical processes under electrolysis of thiosulfate solutions. **Guryanova I.F., Omelchuk A.A., Shvab N.A.**
- 267 Combined electrodeposition of the copper and stibium from acid solutions of chlorides. **Evseeva M.V., Zvuzdetska N.S., Gordienko O.A.**
- 270 Magneto-electrolytic dispersion of metals. **Zaichenko V.N.**
- 274 Kinetics model of zinc-tin alloy passivation in alkaline solution. **Korobov V. L., Petrenko L.V.**
- 277 Determination of the composition of electrochemically active complexes involved in the reduction of palladium(II) from glycinate electrolyte containing excess ligand. **Kublanovsky V., Nikitenko V. and Chornenka N.**
- 280 Influence of Nafion[®] polymeric additive on PbO₂ electrodeposition and properties of resulting materials. **T. V. Lukjanenko, V. A. Kachala**
- 284 Influence adamantane and remantadine in electrolyte anodizing on electroisolating properties oxide films on aluminium alloys. **Lisova E.K.**
- 287 Chromium and iron electrodeposition from solutions containing additives of water-soluble synthetic polyelectrolytes. **Protsenko V.S., Butyrina T.E., Vasilyeva E.A., Ubiikon A.V., Shor A.M.**
- 290 Electroreduction of tin (IV) during electrowinning of bronzes. **Yapontseva J. S., Pirsky Yu. K.**

ELECTROCHEMICAL ASPECTS OF ECOLOGY

- 294 Diagnostics of ion-exchange resins using impedance spectroscopy. **Dzyazko Yu. S., Shilov V. V.**
- 298 Synthesis and application of electroconductive polymers in bio- and chemosensoryty. **Koval'chuk E.P., Ostapovich B.B., Turyk Z.L., Kovalishin Y.S., Pavlishko G.M.**
- 301 Aqueous solution of formaldehyde oxidation on semi-conductor (Tin dioxide) and metallic (Pt and Ti) electrodes. **Kolomytsev D. V., Panov E. V.**

- 304 Ecologically safe processes of electrodeposition of silver and copper out of halogenide solutions. **Tevtul Ya. Yu., Khrab O. V., Gnep R. M.**
- 307 Electrochemical sensors for determination of water soluble polymeric surfactant. **F.A. Chmilenko, I.V. Korobova, T.S. Chmilenko, O.V. Mikulenko**

ORGANIC ELECTROCHEMISTRY

- 311 Electroanalysis Cr(VI) on the chemical modified electrodes of the polymers by the coulostatic method. **Balioz A.V., Obratsov V.B.**
- 314 Electrochemical monitoring of redox polymerization of aniline. **Bandurenko A.S., Ogurtsov N.A., Pud A.A.**
- 317 Inhibitions of processes electrochemical dissolutions amorphous metallic alloys by oligomeric films. **Hertsyk O.M., Kovbuz M.O., Bednarska L.M.**
- 319 The effect of organic solvents on electrochemical reduction of oxygen. **Gromova V.P., Shapoval G.S., Myronyuk I.Ye.**
- 323 The effect of the nature of medium on processes of electrochemical activation and carboxylation of benzoyl chloride. **V. A. Lopushanskaya, V. G. Koshechko**
- 326 Chain mechanism of electrochemical transformation of carbonylcontaining methanofullerenes in fullerodihydrofuranes. **Nastapova N.V., Yanilkin V.V., Toropchina A.V., Morozov V.I., Gubskaya V.P., Sibgatullina F.G., Azanchev N.M., Efremov Yu.Ya., Nuretdinov I.A.**
- 329 New aspects of the electrochemical dehydrocyclization of benzene. **Ogenko V. M., Lysyuk L. S., Volkov S. V.**
- 332 Electrochemical destruction of chloro- and bromoderivatives of phenoxyacetic acid's. **Plaksienko I.L., Guz N.V., Velichenko A.B.**
- 335 About mechanism of the electrochemiluminescence of arenediazonium salts on the metallic cathodes. **Reshetnyak O.V., Smetanets'kyj V.Ya., Koval'chuk E.P., Blazejowski J., Kozlovs'ka Z.Ye.**
- 339 Ionometric definition of the total contents alkaloids of papaver somniferum in the expert-criminal objects. **Suhatskaya I.U., Golovey E.P., Tkach V.I.**
- 342 Electric conductivity and complexation of cesium perchlorat with polyethyleneglycols in acetonitril. **Sytnik O. Yu., Efimov P. V., Krasnopyorova A. P., Korneev S. V., Zholnovach A. M., Metelica A. S.**
- 346 Electrochemical carboxylation of imines with synthesis of fluorocontaining amino acids. **Titov V.E., Bondarenko V.N., Koshechko V.G.**
- 349 Electrochemical characteristics of the ionoselective electrode, convertible to organic cation of the oxitetracline hydrochloride. **Tovstenko U.V., Golovey E.P., Tkach V.I.**
- 352 Electrosynthesis and electrochemical properties of redox active polyindolizines. **Toropchina A.V., Yanilkin V.V., Mamedov V.A., Nastapova N.V., Kalinin A.A., Morozov V.I., Shekurov R.P., Isaikina O.G.**
- 355 Complexation of thiaminediphosphate chloride with Cu^{2+} in water and in water-propan-2-ol (20% wt) at various temperatures. **Tsurko E.N., Bondarev N.V., Bespalova I.I.**
- 358 The influence additions of organic solvents on the dissimilar associates with the participation of rhodamines. **Chernaya T.A., Chechui A.O., Kurilko S.A., Chernyy A.V., Shapovalov S.A.**
- 361 Peculiarities of ion-ion and ion-molecule interactions of 1-1 electrolytes in propylene carbonate. **T. V. Chernozhuk, O. N. Kalugin**
- 365 Electrosynthesis and electrochemical reduction of carbonyl- and phosphorylcontaining fullerene derivatives. **Yanilkin V.V., Nastapova N.V., Toropchina A.V., Morozov V.I., Gubskaya V.P., Nuretdinov I.A.**
- 368 Study of the initial stages of aniline electrochemical polycondensation by the quartz microbalance method. **Yatsyshyn M.M., Koval'chuk E.P., Pereviznyk O.B.**

- 371 Electrochemical formation of polyaniline composite materials. **Fatyeyeva K., Pud A., Tabellout M.**
-

ANODIC PROCESSES AND METAL CORROSION

- 375 The determined stage one-electron charge transfer through border interphase. **Jelali V.V.**
- 378 Electrochemical validation of choice of constructive metal. **Kuzyukov A.N.**
- 381 Forecasting of composition of passivating layers at anodic dissolution of metals. **V. I. Larin, E. A. Samoilov, S. A. Shapovalov**
- 384 Anodic behaviour of aluminium alloys in water and water-alcohol solutions of alkali. **T. Lukashchuk, A. Guzhva**
- 388 Electrochemical and corrosion behaviour of superhard materials in acids solutions. **Malyshev V.V., Gab A.I., Brusikova D.-M.Ya., Astrelin I.M.**
- 392 Adsorptive and inhibiting properties of the imidazoline derivatives. **Obraztsov E.**
- 395 Preventing corrosion of mild steel by coatings on a basis of some forms of polyaniline. **Ogurtsov N.A., Kharaneka R.M., Shapoval G.S.**
- 398 Electrochemical behaviour Ni, Cr and Mo in ozonized solutions sulfuric acid. **Cherkas K.V., Tatarchenko G.O.**
- 402 Electrochemical characteristics of titanium nickelide with an austenitic structure. **Shcherbakova L. G., Solonin S. M., Kolomiets L. L., Katashinskii V. P.**
